

ISM 555 – Project Management

Deliverable #2 – Scope Statement

Project Name	Surplus to Serve
Project Manager	Team 3 (Vamshi Aitharaju, Bhavani Durga Koukuntla, Navya Sri Katta, Jahnavi Chalapaka)

Project Purpose	
The " Surplus to Serve " project aims to reduce food waste on the NAU campus by redistributing surplus food from dining facilities to individuals facing food insecurity. The project will implement a structured system for food collection, storage, and distribution while ensuring compliance with food safety standards. It will also encourage student involvement and promote sustainability through composting non-distributable food	
Goals and Objectives	
1. Redirect surplus food from NAU dining services to individuals and organizations in need. 2. Minimize campus food waste and encourage responsible consumption. 3. Develop a volunteer network of students to assist in collection and distribution efforts. 4. Ensure compliance with health and safety regulations throughout the redistribution process. 5. Monitor and report on the impact of food waste reduction efforts.	
Scope Summary/Boundary Conditions	
The "Surplus to Serve" project will focus on food recovery and redistribution within the NAU campus. The primary goal is to collect surplus food from dining halls and designated food service locations, store it safely, and distribute it to students, shelters, and community members in need. The project will also implement sustainability measures, such as composting food that cannot be distributed. This project is limited to the NAU campus and will not extend to off-campus restaurants or grocery stores. It does not involve cooking meals but focuses solely on recovering and redistributing pre-packaged, safe-to-consume food.	
Scope Details	
In Scope	Out of Scope
Retrieval of surplus food from on-campus dining facilities	Collection of food from off-campus restaurants or grocery stores.
Proper storage and handling to maintain food safety and quality	Financial assistance or direct funding to food recipients.
Timely redistribution to students and community people who has food insecurity and are in hungry	Long-term food storage or refrigeration beyond the daily collection and distribution process.
Volunteer recruitment and training for food collection and distribution.	Preparation or cooking of meals (only pre-packaged and safe-to-distribute food will be handled).
Sustainability practices, including composting for non-distributable food items.	following existing food safety rules but does not seek to change laws or policies.
